

## Jirut Boonhai

Frontend Developer

### Profile

Name : Jirut Boonhai

Tel : 095-776-9560

Email : artstyles.dev@gmail.com

Github : github.com/artstyles-dev

Portfolio : artstyles-portfolio.vercel.app

### Languages

HTML , CSS , JavaScript , TypeScript , SQL

### Frontend

React JS , Next JS , Tailwind CSS , Bootstrap ,  
Shadcn UI , React Native , Redux toolkit , Zustand

### Backend

Node JS , Express JS , RESTful API , Supabase ,  
PostgreSQL , MySQL

### Tools

Docker , VScode , Git/Github , Postman , Figma ,  
ClickUp , Trello

### Summary

A passionate Frontend Developer with a strong interest in building visually appealing and user-friendly web and mobile applications. Skilled in React, Next.js, React Native, and Tailwind CSS, with hands-on experience from comprehensive personal projects. Possessing a mindset for rapid learning and exponential growth, I am highly motivated to elevate my technical skills and contribute to impactful digital products.

## Work experience

### Full-Stack Developer (Jun 2025 – Present)

Engineered an end-to-end logistics platform for used cooking oil collection, streamlining workflows between back-office administrators and field riders.

Developed a secure web-based Admin Dashboard using TypeScript, Tailwind CSS, and Supabase. Implemented role-based access control (RBAC), authentication, and full CRUD capabilities to efficiently manage store data and user roles.

Built a cross-platform mobile application using React Native tailored for field collectors. Key features include photographic proof of purchase uploads, automated digital receipt generation, and real-time push notifications.

Integrated external routing capabilities using Google Maps links to optimize navigation and ensure riders can accurately locate stores.

Architected the backend and database structure with Supabase (PostgreSQL), utilizing SQL trigger functions to handle automated status updates and ensure seamless data synchronization between the web and mobile apps.

## Projects portfolio

### Project 1: Full-Stack E-Commerce

A full-stack e-commerce platform featuring secure user authentication, a dynamic storefront, and an Admin Dashboard with complete CRUD management.

### Project 2: Persistent To-Do List

A responsive task management application emphasizing clean UI and modern state management, utilizing LocalStorage for persistent data tracking.

### Project 3: Dynamic Recipe Explorer

An interactive restaurant website that consumes external APIs to dynamically fetch and showcase menus alongside recipe video tutorials from YouTube.
